TriStar Hot Water Sets

"Meters & Controls has been in business since 1920. Taking care of customers is our specialty"

Keep us in mind for all of your Equipment Needs:

Gas Meters

Burner Controls

Flow Meters

Heat Transfer

Filtration

Temperature

Pressure

Strainer

Filter Press

TriStar LTD's line of Hot Water Sets provide all components, including controls, between the boiler and the process application in heat exchanger systems. Commonly used in Chemical, Food & Beverage, and Pharmaceutical industries for:

- **CIP Systems**
- **Pasteurization**
- **Plate Heat Exchangers**
- **Process Vessels**
- **Reactor Vessels**
- **Shell & Tube Heat Exchangers**

Ideal for applications such as pasteurization, TriStar Hot Water Sets are available in 20 standard models to work with most systems. Flow rates range from 25 GPM to 400 GPM. Both carbon steel and 316 stainless steel models are available. TriStar will custom design and build other systems to match your unique specifications.
